

# D-FUSE

# D-FUSE®

## Data Fusion Ecosystem

D-FUSE is a multi-dimensional, sensor agnostic, commercial off the shelf, Big Data Analytics Platform that provides the capability to analyze and fuse multisource data feeds from day one.

### Out of the box Intel

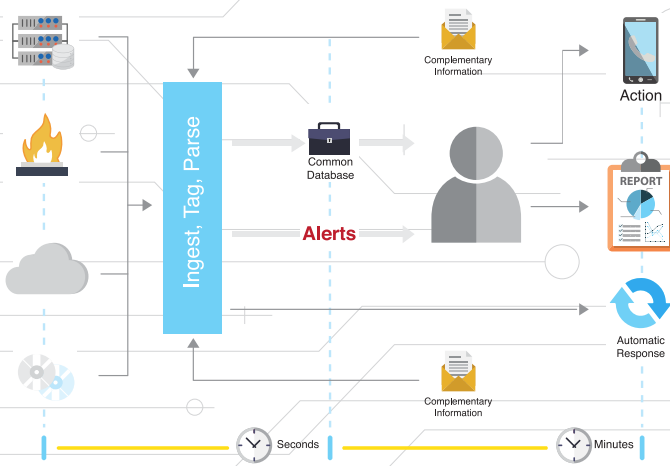

Ingest, tag, parse and operationalize any type of digital data and exploit existing, forward deployed operational capabilities.

Provide reports, multi-domain awareness and common operating picture at the strategic, operational and tactical levels.

Handle evolving observables such as people and vehicles, actions and transactions, and patterns of life.

### Turn-key Open Source Solution

D-FUSE's end-to-end Turn-key solution integrates open source architecture on open standards, which minimizes total cost of ownership and reduces time to market at a fraction of the cost.

### Customizable, scalable and modular

- + Automated Data Mining
- + Automated Data Extraction
- + Advanced Searches
- + Spatial temporal correlation
- + Video and image processing
- + Open source monitoring
- + Analyst collaboration
